

Quick-shoe Model 2

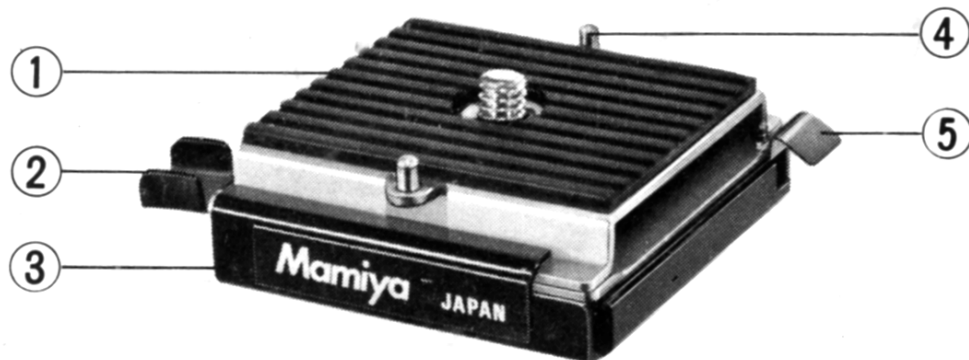

By using the quick-shoe, the camera can easily and quickly be mounted onto a tripod and it can be used with any of the Mamiya Professional cameras.

Procedure:

1. Loosen the lock lever (2) by moving the lever to the opposite direction of the arrow mark on the lever.
2. While depressing the safety lever (5), pull out the camera mounting base (1) toward the safety lever.
3. Attach the mounting base to the camera and attach the separated shoe (3) to the tripod.
4. Slide the mounting base attached camera into the shoe fixed on the tripod.
5. Move the lock lever in the direction of the arrow until it stops. The camera will then be securely mounted on the tripod.

NOTE:

When using a 35 mm camera, remove the both sides guide pin (4) by unscrewing them counterclockwise and store them where they will not be lost.
