shutter		Seiko #1 electronically controlled lens shutter
minimum aperture		64
Standard rail time	Minimum shooting distance	5.9m
	Minimum shooting magnification	0.11 times
	Picture size	50.7×67.6cm
40mm extension rail	Minimum shooting distance	4.0m
	Minimum shooting magnification	0.19 times
	Picture size	29.5×49.4cm
80mm extension rail	Minimum shooting distance	3.2m
	Minimum shooting magnification	0.27 times
	Picture size	20.8×27.8cm
filter size		φ82mm
size		101.0×107.0×245.0mm
mass		1,660g

*Data is calculated using a diagonal angle of view.

For Mamiya, Bronica & Fuji GX680 medium format cameras and accessories go to : www.ianbfoto.com

- The GX M 500mm comes standard with a dedicated lens mount (rail & ring) to secure the lens.
- Since it is a long focal length lens and the lens is large, it is easily affected by blur. Please use a tripod with sufficient strength and rigidity.
- When shooting with a shutter speed slower than 1/60, it is effective to shoot with the mirror up to reduce blur.
- When shooting vertically, the mirror may break at the top of the viewfinder, but this does not affect the image.
- Tilt function cannot be used.
